Sokny Ran

Software Engineer | Full-Stack Developer | AI-Assisted Development

Phnom Penh, Cambodia · soknyran.dev@gmail.com · linkedin.com/in/sokny-ran · github.com/soknyran

PROFILE

Software Engineer specializing in enterprise web applications, financial systems, and AI-assisted software modernization. Experienced across backend, frontend, database, integration, deployment, and production support using Java, Spring Boot, Next.js, TypeScript, JavaScript, PostgreSQL, and RESTful APIs. Currently leading WeCMS: maintaining the legacy JexFrame production system and building its Spring Boot and Next.js successor, now deployed to UAT.

TECHNICAL SKILLS

Backend
Java · Spring Boot · REST APIs · JexFrame · JPA / Hibernate · JdbcTemplate

Frontend
Next.js · React · TypeScript · JavaScript · JSP / JSTL · jQuery · HTML · CSS · Tailwind CSS

Database
PostgreSQL · Oracle · SQL

Build & Delivery
Gradle · npm · Git · GitLab CI/CD · SVN · JBoss / WildFly · Tomcat

Enterprise & Integration
Financial Systems · Banking Integration · ERP Integration · JEX SimpleBatch · SFTP · Batch Processing

AI-Assisted Engineering
Claude · Claude Code · ChatGPT · Codex · MCP

Used for analysis, implementation, debugging, testing, refactoring, and documentation, with engineering review of all output.

EDUCATION

National University of Management
Bachelor's Degree, Information Technology
Nov 2017 – Sep 2021

Korea Software HRD Center
Information Technology Training Program
Mar 2021 – Aug 2021

LANGUAGES

Khmer · English

PROFESSIONAL EXPERIENCE

Software Engineer
Sep 2021 – Present

KOSIGN (Korea Software Innovation Global Network)
Phnom Penh · Full-time

- Lead development and modernization of WeCMS, a Cash Management System for enterprise customers in Vietnam: multi-bank accounts, treasury, payment workflows, and ERP integration.
- Maintain and enhance the legacy production system: new features, bug fixes, production issues, and urgent customer requests from the Product Owner team.
- Lead the modernization of WeCMS and WeCMS Batch from JexFrame to Spring Boot and Next.js; the modernized version is currently deployed to UAT.
- Apply Claude Code and other AI tools to analysis, architecture, implementation, testing, debugging, refactoring, and documentation, with engineering review.
- Build backend services, REST APIs, batch processes, and PostgreSQL solutions, and frontends with Next.js, React, TypeScript, JSP, and jQuery.
- Collaborate with Product, QA, Infrastructure, database, and development teams across Korea, Vietnam, and Cambodia.
- Previously developed and maintained WABOOKS, WABOOKS TA, and JexAdmin for Cambodia and Vietnam, now running in production.

Technical Support Specialist
Apr 2018 – Jan 2021

CAMBODIASOFT
Phnom Penh · Full-time

- Customized business software to fit customer requirements.
- Provided remote and on-site technical support and troubleshooting.
- Supported product demonstrations and trained sales teams on business applications, including hospital, hotel, POS, and endpoint-security solutions.
- Led software implementation, configuration, and customer training, and installed and maintained server-side and related IT systems.

SELECTED PROJECTS

WeCMS Modernization · Project Lead / Full-Stack Developer — UAT · Active Development
Rebuilding an enterprise Cash Management System from JexFrame to Spring Boot and Next.js on a legacy-compatible PostgreSQL schema, with AI-assisted analysis.
Java 21 · Spring Boot · Next.js · React · TypeScript · PostgreSQL · Gradle · GitLab CI/CD

WABOOKS / WABOOKS TA · Full-Stack Developer — Production · Previous Responsibility
Business and accounting platform for Cambodia and Vietnam, with company-facing and tax-accountant workflows in one JexFrame application.
Java · JexFrame · JSP · TypeScript · JavaScript · jQuery · PostgreSQL

JexAdmin · Software Engineer — Production · Previous Responsibility
Shared configuration platform for WABOOKS, WABOOKS TA, and legacy WeCMS.
Java · JexFrame · JSP · jQuery · PostgreSQL
